Proposed decisions

- Propose CREATE_NEW_DEDICATED_REFERENCE_STILL for all 14 beats; reject cross-beat sharing.
- Propose exactly 34 assetType corrections from generated_clip to controlled_image; retain CONTROLLED_STILL.
- Propose the five-second source clip fit plan with deterministic 30-fps trim or end-frame hold and disclosed frame rounding.
- Allow same-beat aliases only if visual description, prompt, ownership and rights, and output specifications are identical, and the resulting still is reviewed and approved for both roles. No alias is pre-approved.
